Many of Kenya’s entrepreneurs especially start-ups and Micro small medium enterprises face numerous challenges navigating the regulatory environment leading to a high informality rate of 79 percent (KNBS MSME Report 2016).

The state of informality leads to lack of sufficient data for government as well as other stakeholders make optimal policy and other interventions needed to develop SMEs as well as impedes SMEs from becoming globally competitive. Kenyan SMEs have a mortality rate of 75 percent within three years of inception (3 out of 5 SMEs dying) with top reasons for business closure being:

- Shortage of Funds
- Too Few Customers
- Too many competitors
- Personal Reasons
- Stock/Raw Material Shortage
- Legal Problems/Regulation
- Lack of market
- Local Competition
- Power Interruption
- Licenses
- Interference from authorities
- Lack of collateral for credit
- Poor Security
- Poor Road/Transport
- Taxes
- Other Government Regulation

Further SMEs face a variety of challenges that continue to impede their growth as illustrated below.
Government Reforms

The Government’s economic plan, implemented over the past six years, has addressed various bottlenecks facing businesses such as increasing connectivity by expanding affordable power supply, rail and road networks, ports, markets locally and internationally, affordable financing mechanism and other initiatives that complement the Ease of Doing Business agenda.

The Government is committed to improving the business environment in Kenya to make the country the preferred destination for local and international investors.

The government has in particular placed emphasis on reforms that directly improve processes and costs associated with a broad range of business-related measures such as Company Registration, construction permits, Property Transfers, Commercial litigation, the insolvency framework amongst others. This has been made possible through enacting legislation, re-engineering processes, eliminating red tape, in critical areas that facilitate efficiency in the public sector space interface with the private sector.

In collaboration with the private sector, the Government continues to identify and implement cross-cutting reforms to improve the business regulatory environment on the platform of the Ease of Doing Business Reforms Agenda. Some of the areas in scope have included:

- Starting a business
- Dealing with construction permits
- Getting electricity
- Registering property
- Getting credit
- Protecting investors
- Paying taxes
- Trading across borders among others

To improve Kenya’s business environment, the Government in 2014 established a multi-institutional Business Environment Delivery Unit, which draws membership from various ministries, departments and agencies. The Delivery Unit is mandated to champion the implementation of various business reforms in partnership with the private sector. In 2018, H.E the President strengthened this approach by establishing the Department of Business Reforms and Transformation: a dedicated and resourced Government organ to implement initiatives that make Kenya more competitive both locally and internationally.
The department of business reforms and transformation (Ease of doing business) under the ministry of east Africa community and regional development supported by UK Kenya Tech hub among other partners have created an SME Business regulatory toolkit that espouses to help SMEs

1. Engage with and understand the Kenyan regulatory environment in an easy and accessible manner
2. Develop awareness to unblock regulatory barriers and enable SMEs in navigating regulatory complexities
3. Assist in refining Kenya’s business regulatory environment through feedback

This toolkit is freely available to entrepreneur in Kenya and is structured in an easy to unders manner to enable you get the information they need in one place.

The toolkit is broken down into for key business development stages and enumerates the regulatory requirements as well as identifies key regulators within each stage.

The toolkit across the four stages provides guidance for regulations and support agencies that are cross cutting to all business as well as to the following identified sectors:

Agriculture  Education  Energy  Health  Manufacturing

Tourism  ICT  Finance  Import-Export  Construction
Plan your business

The planning stage toolkit section considers key thematic areas and related support agencies that entrepreneurs who are at idea stage of their business can consider for support and information.

Entrepreneurs at idea stage grapple with the following key challenges:

A. Training support  
B. Market Information  
C. Finance  
D. Intellectual Property  
E. Research and Development

The following section details government agencies and the support offered to SMEs based on the identified thematic areas.

A-Training and Capacity Building

Numerical Machining Complex offers mechanical and engineering services to the agricultural, industrial and automotive sectors in the East Africa market. Services offered are:

1. Machining and general engineering  
2. Computer-Aided Design  
3. Computer-Aided manufacture (CAM) – milling, turning, gear cutting and hobbing  
4. Numerical control operations  
5. Foundry casting (both ferrous & non-ferrous)  
6. Fabrication  
7. Laboratory testing – spectrometry, hardness testing and ultrasonic crack detection  
8. Plasma cutting  
9. Sheet metal folding services  
10. Cylindrical & surface grinding
Agency

Kenya Leather Development Council

Sector

Leather Value chain

Support Offered

1-Capacity Building

In collaboration with relevant institutions, KLDC conducts training for new and existing players along the leather value chain.

2-Training and Production Centre for Shoe Industry (TPCSI)

TPCSI is a fully equipped institute specializing in diverse array of training modules for footwear and leather goods production situated in Thika, Kiambu County.

The Institute offers training in four (4) modules:

- Stitching
- Cutting and Costing
- Footwear Design and Manufacturing
- Leather Goods Design and Manufacturing

In each module, the training is undertaken in four (4) levels. These are:

- Basic Skills
- Machine Operations and Control
- Dummy Development
- Prototype and Production

3-Market Linkages & Resource Mobilization

The Council facilitates the participation of leather sector players in marketing fora to connect with consumers at local, regional and international platforms.

The Council also liaises with development partners to mobilize resources for the development of the leather sector.
Agency: Kenya Industrial Training Institute (KITI)

Sector:
1. Mechanical Engineering
2. Building and Construction
3. Electrical and Electronics Engineering
4. Leather Technology
5. Fashion Design and Clothing Technology
6. Foods and Beverage
7. Information Communications Technology
8. Business Management and Entrepreneurship

Support Offered:
Industrial and Entrepreneurship skills training for industrial workers, the self-employed and school leavers

Agency: Miro Small Enterprise Authority (MSEA)

Sector: Manufacturing

Support Offered:
• Entails provision of demand driven capacity building programmes in Entrepreneurship and skills upgrading for MSEs. The module used by MSEA is Start and Improve your Business (SIYB) developed by ILO.
• Incubation of MSE operators/startups to improve their competence in unique skills. This is done at Kariobangi MSE Centre of Excellence.

A bid bond is issued as part of a bidding process by the surety to the project owner, to guarantee that the winning bidder will undertake the contract under the terms at which they bid. KIE charges for this service at a negotiable rate.

Performance Bond Facility

For this product, KIE has set aside funds in a commercial bank to facilitate performance bond facility to its ‘A’ Rated Clients.

D-Intellectual Property

Kenya Industrial Property Institute (KIPI) is a parastatal under the Ministry of Industrialization, Trade and Enterprise Development. KIPIs main function are:

1. Industrial property rights administration
2. Provision of technological information to the public
3. Promoting inventiveness in Kenya
4. Provision of training on industrial property

The following table provides detailed information on the various forms of intellectual property and procedure for application:

<table>
<thead>
<tr>
<th>Intellectual Property</th>
<th>IP Detail</th>
<th>Fees</th>
<th>Forms &amp; Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Trade Mark</td>
<td>A Trade Mark is a sign which serves to distinguish the goods of an industrial or a commercial enterprise or a group of such enterprises. Find out more <a href="https://www.kipi.go.ke/index.php/trademarks">here</a></td>
<td><a href="http://www.kipi.go.ke/images/forms/trademark_forms/trade%20mark%20fees%20local%20and%20foreign.pdf">Link to fees</a></td>
<td><a href="https://www.kipi.go.ke/index.php/trademark-forms">Link to forms</a></td>
</tr>
<tr>
<td>Patent</td>
<td>Invention means a solution to a specific problem in the field of technology. It is; a new and useful art (whether producing a physical effect or not), process, machine, manufacture or composition of matter which is not obvious, or any new and useful improvement thereof which is not obvious, capable of being used or applied in trade or industry and includes an alleged invention. An invention may be, or may relate to, a product, or a process. Find out more <a href="https://www.kipi.go.ke/index.php/patents">here</a></td>
<td><a href="http://www.kipi.go.ke/images/forms/patent_forms/fees.pdf">Link to fees</a></td>
<td><a href="https://www.kipi.go.ke/index.php/patent-forms">Link to forms</a></td>
</tr>
</tbody>
</table>
**Industrial Design**

According to industrial property Act 2001, an industrial design is defined as “any composition of lines or colours or any three dimensional form whether or not associated with lines or colours, provided that such composition or form gives a special appearance to a product of industry or handicraft and can serve as pattern for a product of industry or handicraft”. Find out more [here](https://www.kipi.go.ke/index.php/industrial-design).

**Utility Model**

Utility model means any form, configuration or disposition of element of some appliance, utensil, tool, electrical and electronic circuitry, instrument, handicraft mechanism or other object or any part of the same allowing a better or different functioning, use, or manufacture of the subject matter or that gives some utility, advantage, environmental benefit, saving or technical effect not available in Kenya before and includes micro-organisms or other self-replicable material, products of genetic resources, herbal as well as nutritional formulations which give new effects. Find out more [here](https://www.kipi.go.ke/index.php/utility-models).

**Traditional Knowledge**

The Traditional Knowledge (TK) and Genetic resources (GR) unit, abbreviated as “TK & GR - UNIT” was established at the Kenya Industrial Property Institute (KIPI), in March 2009, to specifically address issues of intellectual property rights relating to traditional knowledge associated with genetic resources for indigenous and local communities practicing traditional lifestyles, their traditional cultural expressions, access and benefit sharing issues, Bonn and Akwe-Kon guidelines, disclosure requirements and other related matters within the national and international framework. Find out more [here](https://www.kipi.go.ke/index.php/traditional-knowledge).
Kenya Industrial Research and Development Institute (KIRDI) is a national research institution established in 1979 under the Science and Technology Ac Cap. 250 of the Laws of Kenya (now repealed and replaced by the Science, Technology & Innovation Act, 2013) and mandated to undertake multidisciplinary research and development in industrial and allied technologies including; Mechanical Engineering, Energy and Power Resources, Leather Technologies, Textile Technology, Industrial Chemistry Environment, Chemical Engineering, Electrical Engineering, Food Technology, Ceramics and Clay Technologies, Information Communication & Technology (ICT) and Mining.

KIRDI offers the following SME support;

1. Common Manufacturing facilities
2. Business Incubation services
3. Product Development
4. Training and Capacity Building

More details about KIRDI’s support to SMEs below:

CMF concept is where KIRDI provides facilities for MSME`s to process their products. Common manufacturing facilities are offered in the following areas:

- Food Technology
- Chemical Engineering
- Leather Processing Technology
- Engineering Development and Service Centre
- Textile Technology
- Ceramics & Building Materials
Business incubation services

KIRDI runs an incubation programme in which startups are housed within the organization for a maximum period of 6 months. We also run a virtual incubation service where Research Scientists support entrepreneurs and industrialists from their establishments. The Incubatees both virtual and inhouse are given technical support, in the specific areas of interest. Incubation services are offered on first come first served basis; In house incubation is strictly pegged on availability of space.

Product development

KIRDI’s Research Scientists assist MSME’s in product development. The Entrepreneurs/Industrialists are aided in improving their products to a competitive quality range that is acceptable in the local, regional and international markets.
Agency

Area of support
Training and capacity building programmes

Details
KIRDI offers practical and industry related training courses that are custom made and focused on the needs of MSMEs. The trainings are conducted in all our technical divisions including; Food processing pilot plant, Mushroom pilot plant, Natural Products, Leather Development Centre, Energy Division, Ceramics Pilot Plant and Engineering Development Service Centre.
Numerical Machining Complex offers mechanical and engineering services to the agricultural, industrial and automotive sectors in the East Africa market.

Kenya Leather Development Council (KLDC) is a State Corporation established by the Government of Kenya under the Kenya Leather Development Council Order, 2011 (Legal Notice No. 114 of 9th September, 2011), under the State Corporations Act (Cap.446), Laws of Kenya. Services include: Capacity building, market linkages & Training and Production Centre for Shoe Industry among others.
Kenya Industrial Training Institute (KITI) is the only Government Department under the Ministry of Industrialization and Enterprise Development offering training. KITI offers industrial and Entrepreneurship skills training for industrial workers, the self-employed and school leavers.

http://kiti.ac.ke/node/1

The Micro and Small Enterprise Authority (MSEA) is a state corporation established under the Micro and Small Enterprise Act No. 55 of 2012. The Micro and Small Enterprises (MSEs) occupy a very strategic position in the development of this country. They cut across all sectors of the Kenyan economy and have been identified as major contributors to employment creation and income generation.

https://www.msea.go.ke/

KIE Limited was established to facilitate development and incubation of micro, small and medium enterprises (MSMEs) countrywide by establishing industrial parks, providing credit and business development services (BDS) in a sustainable manner.

The Agency collects, collates, stores, analyses and disseminates trade information to support enterprise competitiveness. In addition to the market research findings, the Agency obtains export market information from credible sources such as the International Trade Centre (ITC), World Trade Organization (WTO), trade promotion organizations including the Japan External Trade Organization (JETRO), Centre for the Promotion of Imports from Developing Countries (CBI) etc.

The Youth Enterprise Development Fund is a state corporation under the Ministry of ICT, Innovation and Youth Affairs. It was gazetted on 8th December 2006 and then transformed into a State Corporation on 11th May 2007. The Fund is one of the flagship projects of Vision 2030, under the social pillar. Its strategic focus is on enterprise development as a key strategy that will increase economic opportunities for, and participation by Kenyan Youth in nation building. The Fund seeks to create employment opportunities for young people through entrepreneurship and encouraging them to be job creators and not job seekers. It does this by providing easy and affordable financial and business development support services to youth who are keen on starting or expanding businesses.
